

Larry Fox

Larry is an Artist based in Northern Michigan. He creates the three-dimensional work by making a wooden frame and structure and using painting processes to embellish the form. He is inspired by human-created environments, natural environments and outer space. The pieces are primarily constructed from wood and are finished in paint and a clear protective coat. Larry's work draws heavily from three areas in his background: architectural design, film set design and construction, and furniture design. His work can be found in private and corporate collections around the country.
